Highlights

- Multiple companies, languages, currencies and versions
 - Rapid time-to-value
 - Low total cost of ownership
 - Flexible configuration rather than customization
 - Tremendous scalability
 - Popular technology choices
 - Added capabilities with packaged integrations
-

In today's era of cloud, digital reinvention, artificial intelligence (AI), mobile computing and analytics, IT decisions are more critical than ever before. Choosing IBM i running on IBM Power Systems as the foundation for a modern infrastructure means delivering on the promise of these key technologies. Companies need to know that their systems and business processes will meet the highest service levels defined by their business units while being able to handle new business requirements and opportunities.

For many years, IBM i running on Power Systems has helped companies to focus on innovation and deliver new value to their business, rather than diverting money and people to manage their data center operations. When paired with POWER9, IBM i applications perform at the highest level of speed and agility while providing infrastructure flexibility and modern capabilities with the opportunity to lower operations costs. These key benefits—reliability, availability and flexibility have allowed many clients today to gain critical business advantages by tying in cognitive technologies such as AI, IoT and machine learning.

IBM i and Power Systems is an ideal platform to run Oracle JD Edwards on, with high performance and reliability for business-critical applications. IBM i and Oracle JD Edwards have a long and rich history going all the way back to 1977. Since then, IBM i and Oracle JD Edwards products have evolved, serving thousands of customers. Both companies have complimentary product offerings and a strong collaborative relationship.

JD Edwards World

Oracle JD Edwards World is an IBM i and Power Systems specific solution built with RPG. The suite of business applications allows clients to stay on top of enterprise application requirements with a low TCO (Total Cost of Ownership) and high ROI. JD Edwards World has applications and solutions for:

- Financial Management
- Human Capital Management
- Distribution Management
- Manufacturing Management
- Real Estate Management
- Homebuilder Management

JD Edwards EnterpriseOne

Oracle JD Edwards EnterpriseOne is a proven suite of pre-integrated business applications- with extensive core, operational and specific industry functionality for organizations of any size- engineered for:

- Multiple companies, languages, currencies and versions
- Rapid time-to-value
- Low total cost of ownership
- Flexible configuration rather than customization
- Tremendous scalability
- Popular technology choices
- Added capabilities with packaged integrations

EnterpriseOne meets the demands for a modern and simplified user experience. Purpose-built applications are aligned to how users work. Integrated with digital technologies, EnterpriseOne increases productivity, enabling businesses to work faster, smarter and get more done.

IBM i Solution Editions

IBM i Solution Editions are a combination of IBM i and Power Systems coupled with core business applications from industry-leading ISVs like Oracle JD Edwards. IBM i Solution Editions help companies achieve quicker time to value for implementing IT solutions, leveraging the combined experience and expertise of both IBM and ISVs. With 3 possible configurations of IBM i and Power Systems S914 and S922 scale-out servers, IBM i Solution Editions provide flexibility to meet the requirements of many small to mid-sized clients. Oracle JD Edwards users can save up to **35%** on their upgrade to POWER9 by taking advantage of the IBM i Solution Edition program.
